

REMARKS

Consideration of new claims 10-40 is respectfully requested.

The prior art of record, Johnson U.S. Patent No. 5,003,507 is directed to simulating/emulating an EPROM, and is silent as to verifying data. Alcorn U.S. Patent No. 5,643,086, on the other hand, is directed to a very specific technique for verifying/authenticating data such as RSA, and is silent as to presenting information to a person for viewing.

Claim 10 recites "providing to the user for viewing", claims 12 and 13 recite "displaying a registry to a user", claims 15 and 28 recite "presenting the at least one piece of information to a person for viewing." Neither Johnson nor Alcorn disclose this feature.

Applicant submits that the claims define allowable subject matter and are in condition for allowance. If the Examiner has any questions or the Applicant can be of any assistance, the Examiner is invited and encouraged to contact the Applicant at the number below. The Commissioner is authorized to charge any necessary fees or credit any overpayment to the USPTO Deposit Account McAndrews, Held & Malloy, Account No. 13-0017.

Respectfully submitted,

Dated: July 25, 2008

/Lawrence M. Jarvis/
